Mr. Mayor: Build the City!

Event card reference (all 15 cards) | SDG 11 physical city-building game | version as of Oct 7, 2026

Game basics used by the cards

Board	6 x 6 grid (36 cells). Roads fill one full row and one full column, crossing in the middle: 11 road cells, 25 buildable cells.
Adjacent	Shares a side (up, down, left, right). Diagonal does NOT count. A building is adjacent to a road when it touches a road cell.
Zone	A buildable area separated by roads. The cross-road board has 4 zones (A to D).
Pieces	Only 5 types: House, Building, Shop, Green Space, Factory. No other pieces.
Start city	10 pieces: House 4, Building 2, Shop 2, Green Space 2, Factory 0. 15 buildable cells stay empty.
Flow	Get mission, build city, draw 3 event cards, check. The city must meet the mission and all 3 cards to be "Best Mayor".
Actions	BUILD (add a piece), MOVE (take a piece and place it elsewhere), REMOVE (take a piece off), RESTRICT (placement limit).
Deck	15 cards: 5 Requirement, 6 Constraint, 4 Opportunity. Draw 3 per game.
Draw rules	Only draw cards whose prerequisite is met (card 07 needs a Factory). Never draw together the pairs listed under Conflicts, because they cannot both be satisfied.

All event cards

ID	Type	Title	Event (story)	Mayor must / may	City rule	Prerequisite / conflicts
01	Requirement	**Housing Demand**	More people are moving into the city.	Build 1 House	New House adjacent to a Shop OR a Green Space.	-
02	Requirement	**More Green Space**	Residents say the neighborhood needs more green space.	Build 1 Green Space	Green Space adjacent to at least 1 House.	-
03	Requirement	**Local Business**	A local business wants to open a new shop.	Build 1 Shop	Shop adjacent to a House.	**Conflicts:** Not with 06
04	Requirement	**Industrial Investment**	A company wants to invest and create jobs.	Build 1 Factory	Factory adjacent to a Road AND NOT adjacent to a House.	**Conflicts:** Not with 06
05	Requirement	**Community Green Project**	The city receives support for a community green project.	Build 1 Green Space (free)	Green Space adjacent to at least 1 House.	-
06	Constraint	**Budget Cut**	The city government lost part of its development budget.	No new Building, Shop or Factory this event. Moving existing pieces is allowed.	Piece counts of Building, Shop, Factory may not increase.	**Conflicts:** Not with 03, 04, 12, 13, 14
07	Constraint	**Industrial Pollution**	Pollution is a concern around an industrial area.	Move the Factory.	Factory stays adjacent to a Road and NOT adjacent to a House.	**Needs:** City must already have a Factory.
08	Constraint	**Protect Residential Areas**	Residents are worried about industry near homes.	If an existing Factory is adjacent to a House, move it.	No Factory adjacent to a House.	-
09	Constraint	**Limited Land**	The city has limited land for new development.	Choose 1 zone (road-divided area, A to D).	No new pieces in that zone for the rest of this event. Existing pieces stay.	-
10	Constraint	**Overcrowded Area**	One area has become too crowded.	Remove 1 House OR 1 Building.	The emptied cell stays empty until the end of the game.	-
11	Constraint	**Protected Green Space**	Residents want to protect existing green spaces.	Green Spaces cannot be removed.	No Factory adjacent to a Green Space.	-
12	Opportunity	**Urban Redevelopment**	An old part of the city is ready for redevelopment.	Remove 1 House, Shop or Building, then build 1 Building in its place.	New Building adjacent to a Road.	**Conflicts:** Not with 06
13	Opportunity	**Business Growth**	Local businesses are growing and need a new shop.	Build 1 Shop.	Shop adjacent to a House. Bonus if also adjacent to a Green Space.	**Conflicts:** Not with 06
14	Opportunity	**Job Opportunity**	A company offers jobs if the city provides industrial space.	Build 1 Factory.	Factory adjacent to a Road AND NOT adjacent to a House.	**Conflicts:** Not with 06
15	Opportunity	**City Beautification**	The city receives funding to improve the environment.	Build 1 Green Space.	Green Space adjacent to a House. Bonus if adjacent to 2 Houses.	-

Design notes and open issues

Notes found while building the prototype. These are observations, not decisions.

ID	Note
02	Same logic as 05.
03	Same logic as 13 (13 adds a bonus).
04	Same logic as 14.
05	Same logic as 02: "free" has no effect (no budget system).
06	Passes with no action.
07	Can only appear after 04 or 14 built a Factory.
08	Passes with no action if no Factory touches a House.
09	Passes with no action once a zone is chosen.
10	Needs a House or Building on the board.
11	Passes with no action if no Factory touches Green.
12	Changed from optional to required (Oct 7).
13	Bonus has no effect yet (no scoring system).
14	Changed from optional to required (Oct 7). Same logic as 04.
15	Changed from optional to required (Oct 7). Bonus has no effect yet.

Still open for testing

- Cards 06, 08, 09 and 11 can pass with no action, so they give an advantage compared with cards that require building or moving. Consider requiring a change.
- Duplicate logic: 02 = 05, 04 = 14, 03 = 13 (bonus only). About 12 distinct rules out of 15 cards.
- Bonuses (13, 15) have no effect while the game is only win/lose. Decide on scoring or remove them.
- How long a rule lasts is inconsistent: 09 lasts this event, 10 lasts the whole game, 08 and 11 are not stated.
- Exact mission cards, timer length (default 120 s), what happens if an event is impossible, and final number of cards are not fixed.
- Teacher feedback (Oct 7): game is too short (about 3 minutes) and too wide. A narrower SDG 11 focus and longer play (up to 20 minutes) are being considered.
